Summary

I am a passionate Associate Software Engineer / Junior Software Developer pursuing a Bachelor of Information Technology at the University of Colombo School of Computing (UCSC). I specialize in full-stack development using Spring Boot, Laravel, Angular, and MySQL to build scalable web applications. During my internship at NexmatrixLab, I contributed to ERP, POS, and real-time systems, gaining hands-on experience in feature implementation and performance optimization. Since then, I have continued developing my skills through a Software Engineering Diploma at ICET Institute while independently building full-stack projects.

Work Experience

- Internship (Laravel Developer)** Nov 2023 – May 2024
NexmatrixLab

I completed my internship as a Laravel Developer at NexmatrixLab (Pvt) Ltd from November 2023 to May 2024. I contributed to ERP and POS systems by developing modules for medical services, delivery systems, and stock management, enhancing functionalities, fixing bugs, and implementing new features, while supporting full-stack development with Laravel.

Technical Skills

- Programming Languages:** Java, PHP, Python, JavaScript (AJAX), TypeScript
 - Front end Frameworks /Libraries:** Angular, Vue.js, React
 - Database:** MySQL, MSSQL, MongoDB
 - Back end Frameworks:** Spring Boot, Laravel
 - Tools:** GitHub, GitLab, Jira, Postman, IntelliJ, PhpStorm, Swagger
 - Libraries:** Bootstrap, Angular Material, Angular CoreUI, Tailwind CSS
-

Education

- Bachelor of Information Technology** 2021-Present
University of Colombo School of Computing (UCSC)

The degree program primarily focuses on the development of Computer-Based Information Systems (CBIS) for businesses.

- Software Engineering Diploma** 2025-Present
ICET Institute

Currently pursuing a Software Engineering Diploma at ICET Institute.

Projects

- **Chat App** ([GitHub](#))

I have experience in PHP programming and web application development using Laravel, Vue JS, WebSocket (Pusher), and Bootstrap, with a focus on real-time chat systems, and I use tools like IntelliJ IDEA and PhpStorm for coding and project management.

- **Programming languages:** PHP
- **Technologies:** Laravel (REST API), Vue.js, Bootstrap, WebSocket (Pusher), MySQL
- **Tools:** IntelliJ IDEA, Php Storm, GitHub, Postman

- **HR Management** ([Front-End - GitHub](#)) ([Back-End - GitHub](#))

Developed an ongoing full-stack Payroll Management System using React for the frontend and Spring Boot for the backend, automating employee salary processing through RESTful APIs. It calculates salaries, including EPF, ETF, allowances, bonuses, and deductions, and utilizes DTOs for clean data transfer. The system includes a configurable payroll module for dynamic calculation rates and efficient management of payroll records in a relational database, focusing on clean architecture, scalability, and accurate financial computations.

- **Programming languages:** Java
- **Technologies:** Spring Boot, React, Bootstrap, MySQL
- **Tools:** IntelliJ IDEA, GitHub, VS Code, Postman

- **Hospital web Backend** ([GitHub](#))

Skilled Backend Developer specializing in Python/ FastAPI microservices and MongoDB database management, with proven experience building scalable healthcare management systems using modern architectural patterns.

- **Programming languages:** Python
- **Technologies:** MongoDB
- **Tools:** PyCharm, GitHub, postman

- **Restaurant ERP** ([Front-End - GitHub](#)) ([Back-End - GitHub](#))

A Restaurant ERP System was developed using Java, Spring Boot, Angular, and Tailwind CSS to automate operations in mid-scale restaurants, including reservations, HR/payroll, inventory, and order management. As a Business Analyst, I contributed to QA and designed the HR module. The system is scalable and supports a microservices architecture with comprehensive REST APIs. It also provides real-time updates and advanced capabilities, including marketing campaigns and operational analytics.

- **Programming languages:** Java
- **Technologies:** Spring Boot, Angular, Tailwind CSS, Spring Security, and WebSocket, MySQL
- **Tools:** IntelliJ IDEA, Jira, GitHub

- **Hotel System** ([GitHub](#))

Developed an integrated Hotel Management System to modernize operations by automating manual processes related to booking, guest records, billing, and service coordination, leading to improved efficiency, data accuracy, and faster decision-making. This is my final-year university project.

- **Programming languages:** PHP
- **Technologies:** Laravel (Rest API), Angular, Bootstrap, Angular CoreUI, MySQL
- **Tools:** IntelliJ IDEA, PhpStorm, GitHub, Postman

Professional Projects – NexmatrixLab

- **Delivery system and web page**
 - Delivery System and Website
 - Medical service system with a POS system and a web application.
 - Added the Medical Service page and made modifications.
- **Medical Service system with a POS system and a web application.**
 - Implemented a new login page feature, fixed issues in the homepage slide
 - Added a reporting feature (product commission report, Refund report, payment report)
 - Added a zone filtering feature (Campaign view, Banner view, Delivery Man view).
 - Fixed date-filtering bugs.
- **Rt-Ref-Services**
 - Enhanced date-filtering functionality to improve data accuracy and usability.
 - Added a multiple customer address feature to the customer and service order views.

Certificates

- Spring 6 and Spring Boot 3 First Look
- C# Essential Training 1: Types and Control Flow
- Advanced Laravel
- Building RESTful APIs in Laravel
- Red Hat Enterprise Linux 8 Essential Training
- Data Structure & Algorithms in Java for Intermediate Level
- Networking Academy Learn-A-Thon 2020
- Introduction to Cybersecurity
