Summary

I am a passionate Junior Software Developer currently pursuing a Bachelor of Information Technology at the University of Colombo School of Computing (UCSC). I specialize in full-stack development using Spring Boot, Laravel, Angular, and MySQL to build scalable and efficient web applications. During my internship as a Laravel Developer, I contributed to ERP, POS, and real-time systems by implementing new features and optimizing performance. I am a strong problem solver with solid OOP knowledge, continuously improving my skills in modern software development.

Work Experience

- **Internship (Laravel Developer)** **2023/11/13 - 2024/05/13**
  Nexmatrixlab

  I completed my Internship as a Laravel Developer at NexmatrixLab (Pvt) Ltd from November 2023 to May 2024. I contributed to ERP and POS systems by developing modules for medical services, delivery systems, and stock management, enhancing functionalities, fixing bugs, and implementing new features, while supporting full-stack development with Laravel.

Technical Skills

- **Front end:** Angular, React, VueJS, Java Script (ajax), Type Script
- **Database:** MySQL, MSSQL, Mongodb
- **Back end:** Java, PHP, Spring Boot, Laravel
- **Tool:** GitHub, GitLab, Jira, Postman, IntelliJ, PhpStorm, swagger
- **Libraries:** Bootstrap, Angular Material, Angular CoreUI, Tailwind CSS

Education

- **Bachelor of Information Technology** **2021 - Present**
  University of Colombo School of Computing (UCSC

  The degree program's primary focus was the development of **CBIS** for businesses. Completed the first year with a GPA of 2.38.

- **Software Engineering Diploma** **2025 - Present**
  ICET Institute

  The Diploma Reading to the ICET Institute

Projects

- **Chat App** **(GitHub)**

  I have experience in PHP programming and web application development using Laravel, Vue JS, WebSocket (Pusher), and Bootstrap, with a focus on real-time chat systems, and I use tools like IntelliJ IDEA and PhpStorm for coding and project management.

  - **Programming languages:** PHP
  - **Technologies:** Laravel (Rest API), Vue js , Bootstrap, WebSocket (Pusher)
  - **Tools:** IntelliJ IDEA, Php Storm**,** GitHub, postman

- **HR Management** **(Front-End - GitHub)** **(Back-End - GitHub)**

  Developed an ongoing full-stack Payroll Management System using React for the frontend and Spring Boot for the backend, automating employee salary processing through RESTful APIs. It calculates salaries, including EPF, ETF, allowances, bonuses, and deductions, and utilizes DTOs for clean data transfer. The system includes a configurable payroll module for dynamic calculation rates and efficient management of payroll records in a relational database, focusing on clean architecture, scalability, and accurate financial computations.

  - **Programming languages:** JAVA
  - **Technologies:** Spring Boot, React, Bootstrap,
  - **Tools:** IntelliJ IDEA, GitHub, VS code, Postman

- **Online Store** **(GitHub)**

  I developed IRA Enterprises' secure online shopping platform using PHP, Laravel (REST API), Angular, Bootstrap, and Angular Material to ensure verified sellers and prompt delivery, and developed it with IntelliJ IDEA and PhpStorm.

  - **Programming languages:** PHP
  - **Technologies:** Laravel (Rest API), Angular, Bootstrap, Angular Material
  - **Tools:** IntelliJ IDEA, Php Storm, GitHub, postman

- **Blog System** **(GitHub)**

  I created an education blog using OOP PHP and Bootstrap to share knowledge, working on the project with VS Code.

  - **Programming languages:** PHP
  - **Technologies:** Bootstrap
  - **Tools:** VS Code, GitHub

Projects (ICET)

- **FashionFlow POS** **(GitHub)**

  I successfully developed and completed my ICET Institute final project using JavaFX, IntelliJ IDEA, and SceneBuilder to enhance my Java fundamentals.

  - **Programming languages:** Java
  - **Technologies:** JavaFX
  - **Tools:** IntelliJ IDEA, SceneBuilder, GitHub

Group Project

- **Restaurant ERP** **(Front-End - GitHub)** **(Back-End - GitHub)**

  A Restaurant ERP System was developed using Java, Spring Boot, Angular, and Tailwind CSS to automate operations in mid-scale restaurants, including reservations, HR/payroll, inventory, and order management. As a Business Analyst, I contributed to QA and designed the HR module. The system is scalable and supports a microservices architecture with comprehensive REST APIs. It also provides real-time updates and advanced capabilities, including marketing campaigns and operational analytics.

  - **Programming languages:** Java
  - **Technologies:** Spring Boot, Angular, Tailwind CSS, and Spring Security, WebSocket
  - **Tools:** IntelliJ IDEA, Jira, GitHub

Final Projects (UCSC)

- **Hotel System** **(GitHub)**

  Developed an integrated Hotel Management System to modernize operations by automating manual processes related to booking, guest records, billing, and service coordination, leading to improved efficiency, data accuracy, and faster decision-making. This is my campus final year project.

  - **Programming languages:** PHP
  - **Technologies:** Laravel (Rest API), Angular, Bootstrap, Angular Core UI
  - **Tools:** IntelliJ IDEA, Php Storm, GitHub, postman

Projects (Nexmatrixlab)

- **Delivery system and web page**

  - Delivery system and web page
  - Medical service system with a POS system and a web application.
  - Add the Medical Service page and modifications

- **Medical service system with a POS system and a web application.**

  - Implemented a new login page feature., modification error in home page slider, mobile app.
  - Add to the report feature (product commission report, Refund report, payment report)
  - Add to the zone filter feature (Campaign view, Banner view, Delivery Man view).
  - Date filter bug fix

- **Rt Ref Services**

  - Enhanced date filtering functionality improves data accuracy and usability.
  - Multiple customer address feature add to customer view and service order view

(Merk Distribution web, Stock Manager POS system, Matrix Cloud ERP system, Click4ac ERP system)

Certificates

- Spring 6 and Spring Boot 3 First Look
- Advanced Laravel
- Building RESTful APIs in Laravel
- Red Hat Enterprise Linux 8 Essential Training
- Data Structure & Algorithms in Java for Intermediate Level
- Networking Academy Learn-A-Thon 2020
- Introduction to Cybersecurity
